Holiday Wish List

New Skills

1. Use filter by selection.

Activity Overview

Making a list and checking it twice – before you know it, the holidays will be here once again and you may be asked by your friends and relatives to help them come up with clever, entertaining, and original gift ideas for you. Oh, the fun you can have with this one! But in the event you need some help deciding just what it is you might want to ask for, there are many online stores that offer suggestions about items that may peak your interest.

The following activity illustrates how a database can be used to hold information about the top picks of suggested online holiday gifts for teens.

Instructions

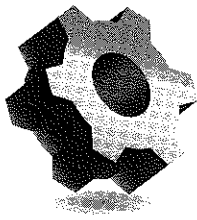

1. Create a NEW database.
2. Name the database HOLIDAY WISH LIST.
3. Create a NEW table in Design View.
4. Set up the database table by using the database structure provided below.

Database Structure

FIELD NAME	DATA TYPE
Item Name	Text
Web site	Hyperlink
Price	Currency

5. Save the table as WISH LIST without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown.
7. Adjust the Field Name column widths as necessary.
8. Resave the table.
9. Carefully proofread your work for accuracy.
10. Print a copy of the WISH LIST table if required by your instructor.
11. Use the Filter by Selection function to find all items that cost \$49.99.
12. Print a copy of the table that contains all items that cost \$49.99 if required by your instructor.
13. Do not save the changes to the design of the WISH LIST table.
